① **Release date : October 17th, 2017**
② **The version of updated firmware : R1020**
③ **Refer to the below for the contents updated from R0879 to R1020**

※ NOTICE
### N15 firmware is N15_R1020
N15D firmware is N15D_R1020

A. New Functions

1 Supports MQA playback

We made N15(D) support MQA(Master Quality Authenticated) playback

When playing MQA file, MQA logo will be displayed on the Now Playing screen

2 Added one more service, Napster to Internet Service

If you have ID for Napster, you can enjoy numerous songs at Napster with the N15(D) directly.

3 Support MKA file

MKA file is Matroska Audio file, which is audio container format. We made N15(D) support MKA file also.
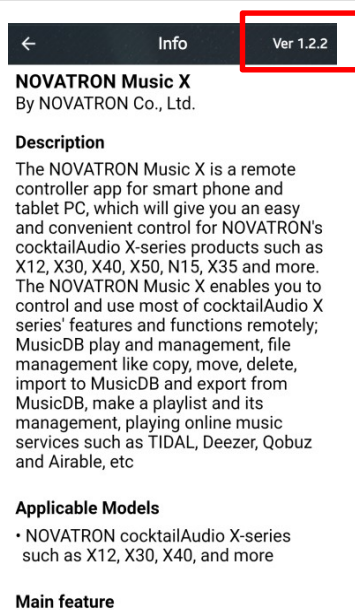

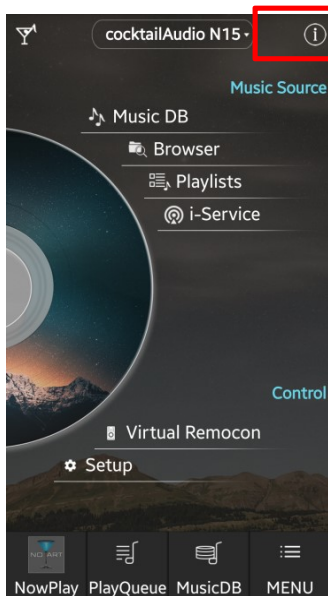

4 Added 45 minutes option to Sleep option

It used to have 5(five) Sleep options like 10 min, 20 min, 30 min, 1 hour, 2 hour and 3 hour. We added one more option, 45 min.

5 Added the option at SETUP to select sample rate of FLAC file at Audio Format option for Qobuz Service

6 Updated MusicX App(version 1.2.2) released

As the updated version(1.2.2) of NOVATRON MusicX App is available at Google Play Store and Apple App Store, please update MusicX App on your controller devices with it.

B. Improvement

MusicX App 1.2.2 has improved very much

Thank you very much
